Task Division

Pages	Subpages (if needed)	Features	Assigned to
LANDING PAGE			
Log in	None	Microsoft OAuth - Email address box - Continue/next button	Keomony
DASHBOARDS (Based on roles, the dashboard may look slightly different, with some features only available to specific roles)			
Admin/Instructor view (Panel)	Course and section creation	- Create a course (should have at least one "course maintainer") - Create a section (should have at least one professor and one TA) - Deactivate/reactivate a course - Deactivate/reactivate a section - Select semester - Grid view and list view - Show all courses (separated by section)	Dominic
	Manage account/role	- Assigned an instructor to the course based on the course section - Add people (TA) and students - Add people and manage their roles - Delete course (toggle or drop down)	Dominic
	Statistic Summary	- View statistics - Set restrictions/limitations on	Dominic

		the token and more	
	Monitoring & Analytics	• View all submissions • Submission statistics (Strict session-only with no persistent backend storage. Students see only in-session feedback on screen, which is destroyed when the session ends or processing completes.) • Set limitation (5 uploads/h) • Queue monitoring (pending, running, and failed jobs)	Dominic
Suggestion from backend	• Staff uploads Canvas ZIP → official run begins (ephemeral processing) • System grades and generates results • Results packaged as CSV + HTML ZIP for download (staff-facing export) • After download: temporary files and detailed artifacts destroyed • Staff retains: downloaded CSV/HTML artifacts (their responsibility, not the system's)		Dominic
Assignment	Individual Assignment	• Uploading button & drag n' drop (single and bulk) • CRUD assignments • Grade assignments (bulk and single) • Deadline (view and edit) • Rubric (view and edit) • Constraints (view and edit) • Statistics: show the percentages of students who have submitted and who haven't.	Vebjørn
	List of all assignments (for each course/section)	• View assignments • Grade assignments (bulk and single) • Deadline (view only) • Statistics: show the percentages of students who have submitted and who haven't.	Vebjørn
	Plagiarism detection	• Activate similar checking or basic detection	Vebjørn
Suggestion from backend	<i>(You can ignore what you have already implemented in the Figma wireframe. I just summarized what Jaxon said in</i>		Vebjørn

	<i>question 5. Feel free to make changes if you think I get it wrong or miss anything)</i> • Instructor-facing assignment configuration wizard • Create and edit grading configurations • Test case configuration interface • Grading/rubric settings (points, hidden/public tests, grading criteria) • Assignment settings (deadline, config) and validation feedback UI (missing test cases, invalid config) → validate configuration to see if test cases are valid, points corrected, and config.json complete • Generate/Save configuration (config.json) workflow • Navigation flow between the assignment overview and the configuration wizard • Assignment form layout and section organization • Confirmation/success state after configuration is saved		
Coding workspace	Landing page	• Title: Assignment/project number • (Blank) File upload input field (box) • Upload (button)	Keomony
	Code checker option page <i>(may need a better name than "code checker". Any suggestions?)</i>	• Title: Assignment/project number • (Filled) file upload input field (box) • Check code (button) • Submit code (button)	Keomony
	Check code result page	• Split-pane code editor: ○ Console output panel/Terminal ○ Test result ○ Feedback ■ Syntax error ■ runtime/compilation error ■ How many tests passed ■ Show expected vs actual output? • View rubric • View constraints • "Check Code" (run tests/practice mode → student debugging) • "Submit" (official grading run → grading + export pipeline: CSV)	Keomony

		• Resubmit code • Dark/light mode support (optional)	
	Submit code result page	• View rubric • View constraints • Grade result box • View feedback button • Resubmit code button	Keomony
Student View <i>(after log in)</i>	List of all courses registered for this semester	• Student name/id profile icon • Grid or list view of all courses the students registered for in the current semester.	Keomony
	Selected course page	• Assignment number <i>(from Assignment page)</i> ↓ <i>Coding workspace landing page (see above)</i>	Keomony
TA Views		•	Dominic Or Vebjørn?
